

TRM Corporate Capabilities

Total Resource Management (TRM) has almost 15 years experience producing and deploying successful business technology solutions focused on enterprise information and asset management. Our expertise leverages business management consulting and broad engineering and technology capabilities, to support strategic planning, systems configuration, and organizational transformation for public and private sector organizations. TRM produces RulesManager SE software, the leading configuration and integration platform for Maximo. TRM also represents and delivers business solutions based upon a series of leading software systems and technology platforms.
