

Maximo 7.5 or 7.6 System Administration

System Administration basics of a Maximo Environment

Audience:

This course is geared toward persons responsible for administering Maximo 7.5 or 7.6.

Purpose:

This course covers the basics of being the System Administrator of a Maximo 7.5 or 7.6 environment, from starting and stopping the application, to changing settings and configuring the database, directly or remotely on the Maximo servers. The course covers tasks commonly performed by the System Administrator, such as creating new users, security groups, start centers, as well as understanding and configuring Calendars, Domains, Escalations, Workflow, Application Designer and a host of other topics.
